ABOUT ME

I am a front-end web developer who transforms concepts into functional and attractive interfaces. I combine technical skills with aesthetic vision to create web experiences that stand out. I seek an innovative team where I can contribute creative solutions while evolving professionally in impactful projects.

PROFESSIONAL EXPERIENCE

Junior Front-End Developer

Startup Clostech (<https://clostech.tech>) | september 2023 - Present

I was part of the front-end team at Clostech (Buenos Aires), a startup that developed technology to superimpose clothing items over users' full-body photos, enhancing the shopping experience and reducing cart abandonment in apparel e-commerce.

- Collaborate on design and functionality of the client side.
- I created a business portal to manage the API and customize components used in pages created on Tiendanube.
- API integrations and external services.
- Collaboration in testing and debugging

Internship

BDT Global | september 2023 - december 2023

Company dedicated to the creation, development and sale of insurance applications.

- Learning about insurance in different areas.
- Learning about Salesforce (cloud-based software) with focus on front-end.
- Realization of insurance for musical instruments (group project) with back-end connection.
- Collaboration in testing and debugging

Junior Front-End Developer

Becation - Streambe Project | august 2023 - october 2023

Becation is a project developed with the Streambe Company. It's focused on management and request of vacations for the employees, making work easier for human resources area.

- Component development with React and Vite.
- API integrations and external services.
- Collaboration in testing and debugging
